Good for you, good for the environment

One Choice Manchester **Topper Range** Catalogue

Good for you, good for the environment

One Choice for **Natural Products**

Natural products available from **Onechoice**[®] include beautiful pillows, quilts & protectors and sumptuous mattress toppers. Naturally, we have packaged our products using materials that can be recycled and are bio-degradable.

Quilts

The right quilt is your best investment in quality sleep. We have three types to choose from ranging from our premium year round lightweight Goose Down, to our 'snuggle in' Wool & Eucalyptus for colder climates and the Cotton & Eucalyptus perfect for the warmer months.

Pillows

A Latex and or Down based pillow is a generation investment in sleep. Choose your right resistance level (softer for back sleepers & firmer for side sleepers) and expect your pillow to be a favourite for 10 to 20 years!

Protectors

By incorporating eucalyptus fibres into both the fabric weave and the filling of our cotton and wool protectors, we have created the driest environment for moisture absorbent sleep.

Toppers

The ultimate luxury! Revive your mattress with a "slink into" down & feather topper or the wonderfully supportive latex topper both covered with our innovative and moisture absorbent cotton and eucalyptus fabric.

Good for you, good for the environment

One Choice for **Sustainable Materials**

We set about the task of designing a range of environmentally responsible manchester with a mindset of sustainability. We wanted to use fabrics and fillings that were less of an imposition to the environment than current offerings in the marketplace – especially, we wanted to be **Polyester Free, Naturally®**.

One Choice

The choice of a cotton and eucalyptus blend of fabric offers significant environmental advantages over those using cotton alone.

Renewable farmed plantations of eucalyptus require up to 20 times less water to manufacture than cotton alone. And the unique properties of eucalyptus fibres ensure a naturally hygienic environment that discourages the opportunity for bacteria growth without the use of harsh chemicals.

Natural Materials

Our fillings are combinations of cotton or wool mixed with eucalyptus which also has wonderful moisture absorption qualities unmatched by cotton.

Additionally, we use the sumptuous qualities of goose and duck downs and feathers and most of our pillows are based on latex rubber.

Equally, our sew in (care) labels are polyester free, as is the cotton interlock stretch fabric we use to secure our mattress protectors and toppers to the bed.

Sustainability

We created the most environmentally responsible packaging currently available. Our premium range is packaged in a printed cardboard box whilst our standard range uses a combination of non-woven eucalyptus with a biodegradable polypropylene.

We will continue to pursue the latest manufacturing technologies to offer the most ozone friendly products available to our Australian and international customers.

Greening Australia

We felt it important to give back to the environment with proceeds from sales in a way that strengthens our commitment to sustainability. We are taking a holistic approach here at **One Manchester** that permeates all of our decision making processes.

We have committed to being polyester free, and are working towards being fossil fuel free. Every product sold will result in an Australian native being planted for future generations.

Good for you, good for the environment

One Choice for **The Environment**

So if you are looking for a brand that is all natural and environmentally responsible – now there is **Onechoice®**

Ozone Friendly

Farmed renewable plantations of Eucalyptus and Cotton that produce oxygen atoms necessary for ozone protection.

In offering polyester free, we have chosen not to offer any fossil fuel derivatives – polyester (including microfibre) or polyurethane (foam & memory foam) in any of our products.

Even our sew in labels and skirts for our protectors and toppers are polyester free, naturally!

Water Conservation

Eucalyptus production uses up to 20 times less water than it takes to manufacture cotton alone.

Water is perhaps the most important commodity on our planet. We felt compelled to offer a fabric that performed better than cotton yet kept many of the natural qualities cotton offers.

This 50/50 blend therefore is smoother than cotton alone and uses up to 10 times less water to produce.

Moisture Absorption

Eucalyptus fibres absorb 50% more moisture than cotton offering dryer and more restful sleep. Our 50/50 blend combines the best of both worlds in moisture absorption.

The natural coolness of cotton with the absorption qualities of the eucalyptus offers superior opportunity for dry and fresh sleep night after night.

Naturally Hygienic

Significantly smoother and softer to touch than cotton and inherently hygienic. The proliferation of dust mites occurs when there is a buildup of moisture.

The eucalyptus fibres firstly absorb moisture then immediately dissipate it into the atmosphere ensuring no build up in the product. Naturally hygienic without the use of chemicals.

Good for you, good for the environment

One Choice for **The Environment**

So if you are looking for a brand that is all natural and environmentally responsible – now there is **Onechoice®**

Natural Latex

Whilst latex is a natural rubber that can only be farmed 9 degrees from the equator, the processing into pillows and mattresses incurs different degrees of synthetic fillers.

Our premium **Onechoice®** talalay latex pillows are as close to a purely natural product as is possible. On some occasions, we have used Dunlop process product which is around 80% natural.

Natural Down

The choice of goose and duck downs and feathers offer the sleeper the ultimate opportunity for softness and insulation in a lightweight manner.

Additionally, down products are robust and can be easily laundered (we prefer a chemically free hand wash) and good care will result in years and years of satisfaction.

Natural Wool & Eucalyptus

In keeping with our environmentally friendly approach, we have chosen to use NZ wool as it is mulesing free.

The combination with eucalyptus gives the fiberfill additional moisture absorbent qualities. It offers additional weight for sleepers who like to snuggle in on those colder nights.

Natural Cotton & Eucalyptus

Natural cotton is (probably) man's best friend when it comes to fabrics that come into touch with the human body. By combining cotton with eucalyptus, we have enhanced performance characteristics in both our fabric and our fill.

The ultimate goal is to provide a range that is high performance and environmentally responsible.

Good for you, good for the environment

One Choice for Toppers

Goose Down & Feather Mattress Topper

The ultimate mattress accessory! You will never enjoy getting into bed so much when you have a **Onechoice®** Down Topper. A top layer of goose down supported by goose feathers & complemented by our exclusive cotton & eucalyptus fabric provides heavenly comfort.

onechoice®

Good for you, good for the environment

One Choice for **Natural Products**

Good for you, good for the environment

Onechoice® is about the journey.

We will vigorously pursue fabrics, fibres, production methods and packaging options that are as environmentally responsible as is possible.

To this end, we already have fresh opportunities to bring you new and exciting product offers that will have less of an impact on our environment than product offers currently available. Stay tuned.

Finally, we need your support. If you are as passionate about what world we will leave our children; then let your friends know about this site so that our reliance on modern bedding options (especially fossil fuelled polyester) can be significantly reduced.
